Warnings and Milestones

The table below is comprised of **Warnings** (negative events) and **Milestones** (positive events) that are tallied to create the students overall severity point score. A warning 's name is typically a short description of what the warning is and can be up to 30 characters long, while the severity is a number ranging from -100 to 0 for a milestone or 0 to 10 for a warning. Listed below are a few examples of different severity levels and the typical warning that would be at this level:

Typically 7 is something devastating to the student, like when their financial aid gets rejected.
A severity of 5 might be when they dropped a class or an instructor concern.
A severity of 2 might be when the student is a first generation college student.
And a severity of 1 might be when the student is absent from one class.

A -100 might be entered for "Proactive Meeting With Student" where the student has accumulated many risks but met with a counselor and is in a great place.
